Arek did an amazing job bringing our paved, grey and overgrown garden back to life. He took time to construct the the decking and paint it carefully.

From the moment I first contacted Arek he was professional, polite, turned up when said he would, sent through a quote and then started when he said he would.

Really happy with the service I received from Arek from start to finish. He provided a very reasonable quote and completed my composite decking job exactly as I had asked for. The turn around was very quick too! Would 100% recommend!

Amazing job completed in our garden by Arek and the team, work was completed quickly and to an amazing standard.

Arek did a fantastic job on replacing our old wooden decking with beautiful composite.
